
CAKUT: enriched terms of the significant pairs
anatomical structure morphogenesis
animal organ development
tube development
tissue development
system development
multicellular organism development
tube morphogenesis
response to endogenous stimulus
circulatory system development
enzyme-linked receptor protein signaling...
cell surface receptor signaling pathway
cellular response to endogenous stimulus
vasculature development
extracellular region
extracellular space
cell population proliferation
regulation of cell population proliferation
cell migration
positive regulation of developmental process
regulation of cell differentiation
response to chemical
regulation of multicellular organismal...
regulation of developmental process
response to stimulus
signaling
cell communication
Interleukin-4 and Interleukin-13 signaling
platelet alpha granule
regulation of cell migration
folic acid
iron
keto diet
vitamin A
vitamin B12
vitamin B6
vitamin C
vitamin D
vitamin E
zinc
