Dravet: enriched terms of the significant pairs

synapse
monoatomic ion channel complex
cell junction
Neuronal System
transmembrane transporter complex
transporter complex
neuron projection
potassium ion transmembrane transport
synaptic signaling
anterograde trans-synaptic signaling
chemical synaptic transmission
trans-synaptic signaling
cell-cell signaling
regulation of trans-synaptic signaling
plasma membrane
nervous system development
cell periphery
synaptic vesicle
exocytic vesicle
presynapse
cation channel complex
potassium channel complex
neurogenesis
central nervous system development
voltage-gated potassium channel complex
synaptic vesicle membrane
exocytic vesicle membrane
apical plasma membrane
transport vesicle
system development
cell projection
membrane
generation of neurons
apical part of cell
multicellular organism development
axon
anatomical structure morphogenesis
SLC-mediated transmembrane transport
developmental process
anatomical structure development
plasma membrane region
Transport of small molecules
Platelet homeostasis
Nitric oxide stimulates guanylate cyclase
cGMP effects
cell junction organization
plasma membrane protein complex

folic acid
iron
keto diet
vitamin A
vitamin B12
vitamin B6
vitamin C
vitamin D
vitamin E
zinc

genes in term
8 genes
29 genes
112 genes
